Profile

I am an exceptional candidate for your Engineering team with skills that transcend the tech sector. My experience in hospitality and as an independent contractor bring a fresh perspective to any project I work on. I am an effective and empathic leader and mentor, ready to help your team succeed.

Tech Experience

Senior Full-Stack Engineer

Volusion, LLC

January 2016 – September 2023

- Grew from Tier 3 Support Engineer to Senior Full-Stack Engineer in less than 2 years
- Technical Lead on major payment processing integrations (PayPal & Stripe)
- Mentor to junior team members and adviser to Product team
- Recipient of many awards including the Employ of the Quarter & Annual Core Value: Transparency awards

Independent Contractor

Self Employed

April 2003 – Current

Throughout my career, I have taken on contract work of varying types and entrepreneurial projects, depending on the amount of free time available.

Most commonly, I have created:

- Static websites (mostly for non-profits) with regular updates
- E-Commerce websites for other entrepreneurs and small businesses
- Data-driven websites for internal use (CRM, etc)

My largest project was creating a white-label website for scheduling and monetizing online coaching/mentoring sessions, which the client was able to use for their business as well as market to others.

Software Engineer

Electronic Financial Group

June 1999 – March 2003

- Provided support to the Lead Engineer for the first year
- Assisted our small IT team with mass update projects
- Lead a team to develop internal payment processing and customer service applications
- Created a web-based electronic check processing system that was one of the first of its kind

Other Experience

Event Coordinator / Trainer

Dagar's Catering

March 2013 – November 2015

- Trained kitchen, bar and service staff
- Maintained presentation standards via event spot-checks
- Create equipment & decor lists for all events (up to 20 / week)
- Converted the manual "pen & paper" process of creating those lists to a Microsoft Access (VBA) Application.

Assistant Manager

1431 Cafe

February 2012 – March 2013

- Hired, managed and trained staff
- Maintained inventory records
- Placed weekly orders
- Prepared daily & weekly financial statements

While an interesting experience, I did discover after a year that general food-service management was not for me.

Game Master

Blizzard Entertainment

July 2007 – October 2011

- Troubleshoot technical issues with game installation & updates
- Resolve "in-game" player disputes
- Provide a themed experience to customers
- Enter player bug reports
