SUMMARY

Seasoned full-stack software engineer with 10+ years of experience building scalable e-commerce applications. Seeking a challenging position to leverage my expertise in NodeJS and .NET development and knowledge of cloud platforms. Migrated an outdated, form-submit checkout platform to a modern NextJS application for a 50% reduction in average checkout time.

EXPERIENCE

Senior Software Engineer & Technical Lead

Volusion

📅 2016-2023 📍 Austin, Texas | Remote from California

Led efforts to maintain and enhance the company's flagship product.

- Tech Lead on replacement of an aging email system with a NodeJS cloud microservice utilizing Postgres and BullMQ, reducing related user complaints by 85%.
- Primary Contributor for PayPal (.NET) and Stripe (NodeJS) payment integrations, increasing transactional revenue by up to 8%.
- Empowered junior developers and provided guidance and feedback to engineering managers.

Freelance & Non-Technical Career

📅 2003-2016 📍 Waco & Austin, Texas

Leveraged communication and problem-solving skills in freelance, service & support to deliver exceptional results to clients, co-workers & employers.

- Problem Solving: Resolved in-game issues for 200+ Blizzard Entertainment users per week, enhancing their gameplay experience.
- Project Management & User Interface Design: Created a re-brandable webinar platform for Jeneth Blackert.
- Data-analysis & Innovation: Created AccessDB inventory application for Dagar's Catering, reducing event planning time up to 50% and providing increased accuracy to "pull-lists".

Software Engineer

Electronic Financial Group

📅 1999-2003 📍 Waco, Texas

Worked with a small team to maintain and develop financial products.

- Created an internal application allowing sales teams to order and fund secured credit cards for the First Freedom Financial product.
- Created a website allowing check scanning and processing via partner company hardware - one of the first ever!
